

นายเกริกไกรวัล สุภาเสพย์ วันจันทร์ที่ 12 พฤษภาคม 2568

ข้อที่ 1: ภาษา Java

```
1  import java.util.Scanner;
2
3  public class DateConverter {
4
5      Run | Debug
6      public static void main(String[] args) {
7          Scanner scanner = new Scanner(System.in);
8
9          System.out.print(s:"Enter day month year : ");
10         String input = scanner.nextLine().trim();
11         String[] parts = input.split(regex:"\\s+");
12
13         int day = Integer.parseInt(parts[0]);
14         String month = parts[1];
15         int yearAD = Integer.parseInt(parts[2]);
16
17         int monthNumber = 0;
18         if (month.equals(anObject:"January")) monthNumber = 1;
19         else if (month.equals(anObject:"February")) monthNumber = 2;
20         else if (month.equals(anObject:"March")) monthNumber = 3;
21         else if (month.equals(anObject:"April")) monthNumber = 4;
22         else if (month.equals(anObject:"May")) monthNumber = 5;
23         else if (month.equals(anObject:"June")) monthNumber = 6;
24         else if (month.equals(anObject:"July")) monthNumber = 7;
25         else if (month.equals(anObject:"August")) monthNumber = 8;
26         else if (month.equals(anObject:"September")) monthNumber = 9;
27         else if (month.equals(anObject:"October")) monthNumber = 10;
28         else if (month.equals(anObject:"November")) monthNumber = 11;
29         else if (month.equals(anObject:"December")) monthNumber = 12;
30
31         int yearBE = yearAD + 543;
32
33         System.out.printf(format:"%02d/%02d/%d\n", monthNumber, day, yearBE);
34     }
```

```
Enter day month year : 12 May 2025
5/12/2568
```

ข้อที่ 2: ภาษา Java

```
DevJava > TextMasking.java > TextMasking > main(String[])
1  import java.util.Scanner;
2
3  public class TextMasking {
4
5      Run | Debug
6      public static void main(String[] args) {
